

DISCOVER THE DIFFERENCE

EXPERIENCE THE DEXTER DIFFERENCE IN BRAKING PERFORMANCE

» UNMATCHED SAFETY:

Experience faster, smoother stops for increased safety on the road.

» CONSISTENT PERFORMANCE:

Enjoy responsive braking without sudden or jerky stopping power.

» LONG-LASTING DURABILITY:

Benefit from consistently longer brake life, saving you time, money, and maintenance headaches.

» SUPERIOR BRAKING POWER:

Experience unmatched braking performance powered by a stronger magnet and Dexter-made brake shoes.

» AMERICAN-MADE QUALITY:

Trust in the reliability and durability of brakes proudly made in the U.S.A. at Dexter's Albion, Indiana plant.

YOUR **SAFETY** STARTS WITH OUR **QUALITY**

Dexter brakes have been a game-changer for our customer's fleets. The improved stopping power and durability have significantly reduced downtime and maintenance costs.

» SHOE & LINING

Dexter produces our brake shoes & lining in our Albion, IN facility. This ensures consistent quality and performance.

» LEVER ARM

The lever arm is made from American steel and is produced in our factory to ensure it works correctly.

» MAGNET

Dexter is the only axle manufacturer that makes its own magnets. This means we can control the whole process and make sure the magnet works correctly. We test every magnet to make sure it's working properly before it goes into the brake.

» ANCHOR POST

The brake shoe is designed for reliable and even braking. It's securely attached to ensure it works consistently when applied.

» BACKING PLATE

The backing plate is a strong steel part that holds the brake together. It's designed to ensure the brake works properly and fits securely.

» MADE IN THE U.S.A.

Our brakes and individual brake components are truly manufactured in the U.S.A. to the highest quality standards.
