

E-Z FLEX®
RUBBER EQUALIZATION SYSTEM

ONE SMOOTH RIDE

- » Improved ride performance
- » Absorbs road shock before it affects your cargo
- » Stylish design with a durable, red powder coat
- » Retrofits to standard equalizer and competitor's products
- » Lubricated bronze bushing provides longer service life
- » Easy installation

REMEDY FOR TOUGH ROADS

» QUIET, DEPENDABLE TOWING

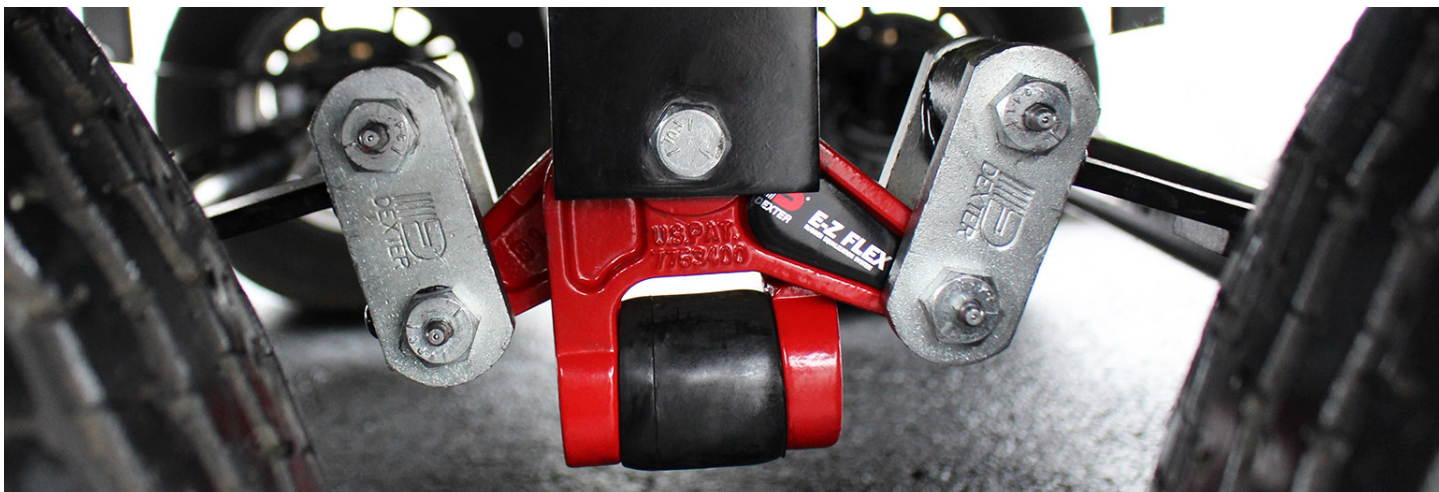

The patented design of Dexter's E-Z Flex continuously pivots and compresses to isolate and absorb damaging road shocks before they are sent to the trailer frame. Delivering a quieter and smoother towing experience than traditional leaf spring suspensions, protecting your trailer and cargo.

» SUPERIOR PERFORMANCE

This system provides a dramatic reduction in acceleration forces on the trailer frame versus a standard equalizer and competitors' products during laboratory and road testing. Paired with our heavy-duty shackle links, your suspension will outperform other products.

» STYLISH LOOK

Let your E-Z Flex suspension upgrade flex for itself. The heavy duty greaseable shackle links, accompanied by the durable and attractive red powder coat finish, will enhance both the look and performance of your ride!

» APPLICATION:

Retrofit kits or factory-installed at manufacturer

33" and 35" axle spacing for tandem or triple applications

System does not affect the ride height of your trailer compared to competitors'

» FEATURES:

Easy installation with less overall maintenance

Five-year limited warranty

ISO 9001:2015 Certified Production Environment
