Subject: New Product Announcement - AXLSENSE Axle Lift Control System

To fully compliment Dexter's (legacy Ingersoll) industry leading SMART-STEER self-steering axle product line, Dexter is excited to announce the launch of a new axle lift controller; the AXLSENSE product line.

Dexter's AXLSENSE product is designed to meet the Ontario and Quebec Safe, Productive, Infrastructure-Friendly (SPIF) regulations. It is a fully automated system which reduces the chance of driver error by reducing distractions and automatically raising the axle(s) for better fuel efficiency, increased wheel end, brake and tire life. Package AXLSENSE with Dexter's SMART-STEER axle to allow your trailer to haul more weight and reduce wear and tear.

Features of the AXLSENSE models:

OPTIONS	AXLSENSE MODEL			
	AS-500	AS-600	AS-603	AS-700
Activates the trailer back-up lights and alarm system	√	√	√	
Lifts the forward steer axle when reversing	√	√	√	
Locks the rear steer axle above 60 km/h		√	√	
Manually lifts the front steer using the 4-way flasher when under 60 km/h		√	√	
Monitors trailer brake air pressure			√	
Dolly application: locks the first axle at 35 km/h, second at 65 km/h, and both on reverse				√
