Subject: Legacy UFP and Titan E/H Compatibility Adapters

Dexter would like to inform customers of a part number change for legacy Titan and UFP electric/hydraulic (E/H) compatibility adapters. In addition, Dexter developed retail packaging kits for the E/H adapters. Moving forward, bulk availability will be replaced exclusively by the two retail packaged kits.

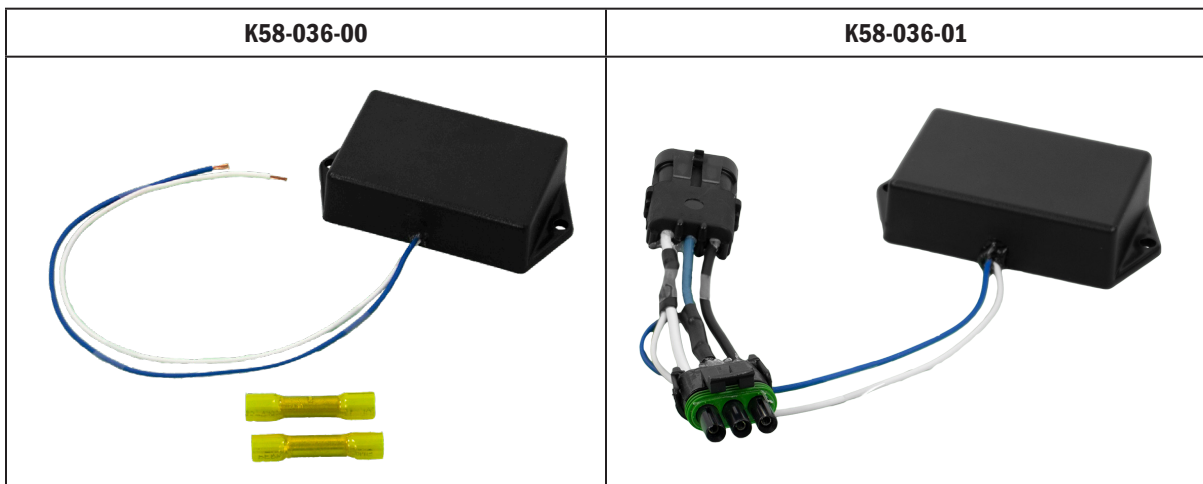

Visually the E/H adapter changes, while the functionality of the adapter does not.

Refer to the DX Series and BrakeRite® service manuals as well as the tow vehicle manufacturer's owner's manuals for additional information and installation instructions. Links to Dexter Service Manuals and Installation Instructions:
