Subject: Changes to 3.5K-6K Integral Stainless Steel Disc Brake Kits and Components

Due to low market demand, Dexter has made the decision to discontinue the integral stainless steel disc brakes. These brakes are replaced with the hat style (outboard) rotor disc brake kits and will need to be replaced in complete sets when being serviced.

Below is a chart listing the discontinued kits with references to the appropriate kits to use in their place. Also included below is a parts breakdown of the hat style stainless steel disc brake kits that are being retained.
