Subject: Medium Duty Wheel Stud Update

To improve product performance, Dexter is increasing the wheel stud length of part 007-115-00 by 0.30". This running change is already in production and does not affect the part number. The longer stud was needed for newer wheel designs that require additional wheel fastener thread engagement.

The updated 007-115-00 is a 5/8" – 18 X 3.46" wheel stud used in hubs and hub-drums with capacities ranging from 8K to 12K will retain the same base or "knurl". The change will not affect any components using the 007-115-00 or aftermarket kits. All part numbers will remain the same moving forward.

Proper wheel attachment is the result of a suitable wheel and fastener selection. It is the responsibility of the installer to verify fastener engagement, as well as avoid potential cap nut interference when selecting these components. Please consult your wheel supplier for detailed wheel information.

A list of axles, hubs, hub-drums and aftermarket kits utilizing the 007-115-00 are below.

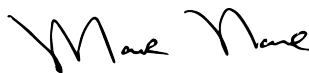

AXLE MODEL
D80 - SPRUNG AXLE
D100G - SPRUNG AXLE
D100D - SPRUNG AXLE
D120 - SPRUNG AXLE
#13 TORFLEX
#13G TORFLEX
#13D TORFLEX
#14 TORFLEX

Note: During service, longer studs can be mixed with shorter studs on the same hub or hub-drum.

PART NUMBER	DESCRIPTION
008-399-07	HUB 8K 865 CUPS & STUDS DISC BRAKE, 5/8", GREASE
008-399-08	HUB 8K 865 CUPS & STUDS DISC BRAKE, 5/8", OIL
