Subject: Breeze LED 360™

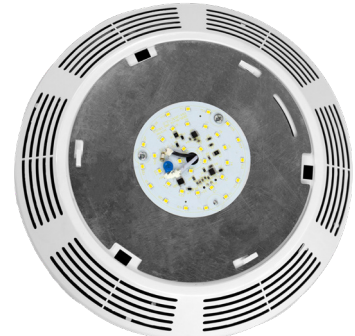

Dexter is pleased to announce a new LED bathroom ventilation fan for the manufactured housing industry. The Breeze LED 360 is available with a powerful 50 or 75 CFM fan. This low profile LED illuminated bathroom ventilation fan helps keep mirrors and windows from fogging during showers. The new LED bath fan light has 34 LEDs that produce 1,000 lumens compared to a 60-watt bulb which produces only 800 lumens. LED bulbs last longer than traditional incandescent bulbs and save energy.

Along with replacing the incandescent bulb, the Breeze LED 360 also has a new damper design. The new damper opens and closes with the fan and remains closed when the fan is off. Having the damper closed reduces moisture, odors and mildew. The 120V AC V2281-50 and the V2281-75 are UL/CSA certified and Made in America. The V2281-50 and V2281-75 use a standard 3" diameter outlet and will replace current V2280-50 and V2280-75 models.

BREEZE LED 360™

LED LIGHT & BATHROOM FAN

PARTS LIST

Old Part Number	New Part Number	Description
V2280-50	V2281-50	120V Lighted Bathroom Fan, 50 CFM, 3" diameter side exhaust
V2280-75	V2281-75	120V Lighted Bathroom Fan, 75 CFM, 3" diameter side exhaust
