Subject: New Door and Vent Aftermarket Kits**Unified Upgrade Door Latch Kit 990003**

The Unified Upgrade Door Latch Kit fits Dexter's upgrade/unified screen doors and includes all of the parts necessary for simple do-it-yourself installation; along with easy to follow instructions. The latch kit's durable injection molded nylon design makes it both robust and easy to clean. Customers can choose a door handle kit that best fits their screen door set-up with either right or left hand options. Dexter's Unified Upgrade Door Latch Kit replaces the existing lever latch and secures the screen door to the primary door.

**Breeze 360 LED Conversion Kit 990002-00**

Dexter's Breeze 360 LED Conversion Kit eliminates the need for a 60-watt traditional light bulb and allows for bright LED illumination with 1,000 lumen capability. The department of energy reports that an LED bulb will last up to 30,000 hours versus 1,000 hours of a 60-watt incandescent bulb, saving the customer both time and money in reduced operating costs. The conversion kit fits the Dexter Breeze 360 bathroom fan and includes an improved damper to help reduce bathroom moisture, odors and mildew.

**Standard Latch Kit
990001-01 (right) & 90001-02 (left)**

The replaceable door handle kit fits Dexter standard screen doors and secures the screen door to the primary door. Customers can choose a door handle kit that best fits their screen door set-up with either right or left hand options. The kit includes all of the parts necessary for simple do-it-yourself installation; along with easy to follow instructions. Crafted with durable injection molded nylon, the robust design allows for easy cleaning and maintenance.

E-Z Grab Screen Door Bar

Dexter's premium E-Z Grab Bar is manufactured to fit most screen doors between 22" to 32". The E-Z Grab is also very easy to install on your screen door with a simple three screw installation. Dexter's long-lasting anodized finish will keep this grab bar looking new and fresh for years to come. This grab bar is not recommended for use as an assistance bar and excessive weight should not be applied to the grab bar.

Please contact your Dexter account manager for additional information and further assistance.
