

PRODUCT BULLETIN #477

Date: February 27, 2023

Subject: Re-rating of 15,000 lbs. 12-1/4" x 5" Drum Brakes & 12,000 lbs. Disc Brakes to 16,000 lbs.

Dexter is increasing ratings on several 15,000 lbs. 12-1/4" x 5" drum brakes and 12,000 lbs. disc brakes utilized on the new Dex-Treme™ D160 axle model. After extensive lab and road tests, and additional engineering analysis and review, these will now be re-rated to 16,000 lbs.

Re-rating these brakes to 16,000 lbs. will not affect the current Dexter part numbers, but part descriptions and literature are being updated to the new capacity. This is a running change and will begin immediately.

For service or repairs on a D150 axle, combining Dex-Treme D160 braking components listed in this product bulletin with those originally installed is acceptable.

AFFECTED PART NUMBERS:

BULK BRAKE P/N	BRAKE KIT P/N	UPDATED PART DESCRIPTION
023-162-00	K23-162-00	12-1/4" x 5" 16K HYDRAULIC, LEFT HAND, DUO-SERVO, W/ PARK, REAR SELF-ADJUST
