## OBSOLESCENCE OF G5 DISC BRAKES

December 19, 2024

Dexter is discontinuing the G5 Disc Brake product offering and replacing it with the Kodiak<sup>®</sup> by Dexter disc brake system. The G5 disc brakes utilize a non-vented disc brake design, while the Kodiak system uses a vented disc brake design, which provides superior heat dissipation and enhances overall braking performance. Please be aware that the G5 and Kodiak disc brake components are incompatible and cannot be interchanged between the two brake systems.

This change is effective immediately.
