

PRODUCT BULLETIN #511 SOLENOID ASSEMBLY

December 23, 2024

Dexter is discontinuing the Coil and Solenoid Assembly (054-101-00) and the Coil and Solenoid Assembly Kit (K71-755-00). The solenoid assembly itself is no longer available; therefore, the new-style integral master cylinder (released 2019) has to be used. If a solenoid and coil need to be replaced, customers must replace the entire master cylinder assembly with the complete Master Cylinder Kit (K71-757-00) which is compatible with both current and earlier models of the DX7.5L and DX8.5L surge actuators.

The K71-755-00 and 054-101-00 will remain available until inventory has been exhausted.

DISCONTINUED COIL & SOLENOID ASSEMBLY:

 <p>054-101-00</p>  <p>*054-101-00 assembled on Master Cylinder</p>	DISCONTINUED PART NUMBER	DESCRIPTION
